

# Your Path to Savings Begins with Allsup Medicare Coordination

## Reduce Claim Costs by Becoming Secondary Payer to Medicare

If one of your non-working, disabled plan participants under age 65 is eligible for Medicare coverage, your Group Health Plan (GHP) can become secondary payer to Medicare for medical claims.

Allsup Medicare Coordination handles and completes this essential process for you by submitting a Payer Status Update (PSU) request to the Centers for Medicare and Medicaid Services (CMS). Establishing a PSU is a critical step to ensure that Medicare accepts primary payer status before the participant's group health plan is moved to secondary payer.

Allsup Medicare Coordination is a smart solution that benefits both your organization and your plan participants. By properly and successfully completing a PSU:

- Your organization will significantly decrease claims costs by transferring primary payer status to Medicare.
- Your Medicare-eligible plan participants don't have to worry about problems or issues caused by an interruption in their healthcare benefits.

## Save Your Organization Thousands of Dollars

With a smooth PSU transition, your organization can reduce unnecessary claims costs and save thousands of dollars. CMS estimates the annual medical claim cost for an individual with a disability is over \$12,000. When Medicare accepts primary payer status, your organization may be able to save as much as \$8,500 per year in claims for each retired or disabled participant.

# Your Shortcut to Success

## How Allsup Medicare Coordination Helps

If you try to move your group health plan to secondary payer without a Payer Status Update (PSU), benefits will not be properly coordinated. Our experts have a long-standing relationship with CMS and we work together to process PSU's as quickly as possible. As soon as Medicare accepts the PSU, you will be notified and your group health plan can be moved to secondary payer. We also provide information to each individual about how their claims should be submitted to Medicare for processing and payment.

**Obstacles that can occur without a PSU in place**

Unpaid or delayed claims

Participants receive bills demanding payment

Claims not submitted to Medicare

GHP pays primary amount in error

GHP pays entire claim

Save

We ensure benefits are properly coordinated

We notify CMS with a PSU

We provide notification to your organization

We communicate directly with your plan participants

Find out how Allsup Medicare Coordination can decrease claim costs by effectively managing the PSU process for your group health plan. Start saving on claims now!
